Misterioso sommergibile bloccato nelle acque argentine

Nelle acque del Golfo Nuevo, che si apre a circa 1300 chilometri da Buenos Aires, unità della marina da guerra argentine sono impegnate in un'operazione la quale dovrebbe concludersi con l'affondamento, la cattura o, almeno, la identificazione di un sommergibile di nazionalità sconosciuta che da parecchi mesi tiene in allarme la flotta della Repubblica. Il sommergibile sarebbe stato bloccato dalle navi argentine che pare siano riuscite a chiudergli ogni via di scampo. Incalzato da sei unità di diverso tipo, della flotta argentina, esso sarebbe stato costretto a infilarsi nella strettoia del Golfo Nuevo, dove il fondale non consente alcuna manovra. A un certo punto, per sottrarsi alla cattura, il sommergibile aprì il fuoco contro le navi argentine che subito risposero con bordate e lancio di bombe di profondità.
